

Benefits of Nordic collaboration

Webinar: Nordic framework for patient safety knowledge and skills

December 16th 2024

Benefits of Nordic collaboration

- Strengthening the commitment of the Nordic countries to improving patient safety and implementing WHO Global Patient Safety Action Plan 2021-2030
- Sharing experience, good practices and educational methods
- Improving patient safety by reducing variation and preventing avoidable harm across the Nordic countries
- Potential benchmark for other WHO member countries

Small nation in a big country

- Iceland can benefit from the experience of larger Nordic healthcare systems, adapting their advanced processes and systems to improve patient safety
- Access to a large professional network creates opportunities for learning, knowledge sharing, and professional development
- Financial benefits include sharing development costs for projects, enabling Iceland to adopt innovations more efficiently

Small nation in a big country

- Iceland's experience in organizing healthcare services in small and remote communities provides valuable insights for other Nordic countries facing similar challenges in rural areas
- Iceland has no choice but to get many things done with few public officials in the healthcare system, providing inspiration to Nordic colleagues who are under constant pressure to increase efficiency and reduce cost
