

Flytdiagram og søkestrategi for søk etter retningslinjer

Forskningsspørsmål: Gir det bedre effekt å stabilisere mennesker med anoreksi ved BMI på 19-20 enn ved BMI på 18-19?

- P – Mennesker med spiseforstyrrelse
- I – BMI 19-20 som målvekt/stabiliseringsvekt
- C – BMI 18-19 som målvekt/stabiliseringsvekt
- O – Tilbakefall, vektnedgang, prognose, utvikling av bulimi, utvikling av bulimiske symptomer

Retningslinjesøk ved Helsedirektoratet 2014:

[United Kingdom guidelines for living donor kidney transplantation 3rd edition](#)

Published 30/04/2011

Export Date: 16/04/2014

These guidelines (3rd edition, published May 2011) address the issues in practice and policy for living donor kidney transplantation. At the time of writing, living donors account for 1 in 2 organ donors and 1 in 3 kidney transplants performed in the UK are from living donors, this representing 38% of the total kidney transplant activity per annum. The latest national statistics show that in 2008-9 and 2009-10, there was an 11% increase in living donor kidney transplants performed year on year, to 927 and 1037 respectively (1). In part, these figures reflect a small but growing number of transplants from paired/pooled donation and non-directed altruistic donors, of which there were 32 and 16 transplants performed in 2009 and 2010 respectively. Over the last 10 years, there has been a 65% increase in overall living donor activity, from 372 donors in 2000-1 to 1061 in 2009-10, with all transplant centres now actively engaged in living donor kidney transplantation. This represen

Medical Eligibility Criteria should also be checked to ensure that the preferred method is not contraindicated.

British Association and College of Occupational Therapists

[Occupational therapy for adults undergoing total hip replacement : practice guideline](#)

Published 14/11/2012

Export Date: 16/04/2014

This publication is an evidence-based resource to support occupational therapists working with adults undergoing total hip replacement. It provides a practice guideline with recommendations for those occupational therapists currently working in this speciality, as well as offering a useful reference document for students. It can also be used to inform service users and carers, together with other health professionals, managers and commissioners working in trauma and orthopaedics, about the roles and responsibilities of the occupational therapist in this clinical area. The resource is supported by an online implementation toolkit.

Clinical Knowledge Summaries

[Depression in children - NICE CKS](#)

Published 01/07/2013

Export Date: 16/04/2014

The prevalence of childhood depression has been estimated to be 1% in pre-pubertal children and around 3% in post-pubertal young people. It is experienced by twice as many adolescent females as males.

British Association and College of Occupational Therapists

[Occupational therapists' use of occupation-focused practice in secure hospitals : practice guideline](#)

Published 27/11/2012

Export Date: 16/04/2014

The emphasis of this guideline is the use of evidence to support and inform clinical practice. It is the UK's first guideline in this area and has been developed by experts from the Forensic Forum, which is part of COTSS - Mental Health. It sets a new standard for best practice and provides 20 evidence-based recommendations for occupational therapists working in secure settings. It helps healthcare professionals gain a better understanding of the role and contribution of occupational therapy and informs patients and carers of occupational therapy interventions available in secure environments.

[Palliative treatment of cancer](#)

Published 22/01/2014

Export Date: 16/04/2014

The duration of palliative treatment for cancer ranges from months and years to a few days. Treatment of the cancer with antineoplastic drugs or radiotherapy may alleviate the symptoms of a patient in a better condition efficiently, while care and alleviation of pain are central in the treatment of a dying patient. At each stage of the disease the aim is to find therapies with beneficial effects outweighing the adverse effects. The treatment alternatives given in this article should be considered from this perspective.

Management of Obesity

<http://www.sign.ac.uk/pdf/sign115.pdf>

Guideline No 115, ISBN 978 1 905813 57 5

February 2010

This guideline provides evidence based recommendations on the prevention and treatment of obesity within the clinical setting, in children, young people and adults. The focus of prevention is on primary prevention, defined here as intervention when individuals are at a healthy weight and/or overweight, to prevent or delay the onset of obesity.

Spiseforstyrrelser ved diabetes - forekomst, diagnostikk og behandling (PDF)

Utgiver: Norges Diabetesforbund. 2005

Målgruppe: Helsepersonell.

Innholdsbeskrivelse:

I denne veilederen er det lagt størst vekt på utredning og behandling av unge med type 1-diabetes og spiseforstyrrelser. Den omhandler bl.a. følgende:

- De vanligste spiseforstyrrelsene ved diabetes
- Subklinisk spiseforstyrrelse ved diabetes
- Tilnærming til en person med spiseforstyrrelse og diabetes
- Motivasjonsmetoder
- Forebygging og behandling
- Familiearbeid og familierapi

Sykelig overvekt - Prioriteringsveileder

Utgiver: Helsedirektoratet. 2009

Målgruppe: Spesialisthelsetjenesten.

Innholdsbeskrivelse:

Prioriteringsveilederen skal bidra til at «like» pasienter blir vurdert likt, uansett hvor i landet de bor og uavhengig av hvilket sykehus de henvises til. Den skal være et praktisk hjelpemiddel når

spesialisthelsetjenesten skal ta stilling til om en pasient som er henvist, skal ha «nødvendig» (prioritert) helsehjelp. Prioriteringsveilederens generelle del informerer om innholdet i prioriteringsforskriften.

Veiledertabellen består av en liste over tilstander eller kliniske bilder med veiledende rettighet og frist for hver tilstand – både for voksne og barn.
